

# EECS 498: Introduction to Algorithmic Robotics Fall 2018

Build the foundation for your future  
in robotics.

- Convex Optimization
- Motion Planning
- Grasping
- Point Cloud Processing
- Probabilistic Reasoning
- Kalman and Particle Filters

**Pre-requisites:** Required: EECS 280. Recommended:  
EECS 281, Math 214.

**Instructor:** Prof. Dmitry Berenson

**Time:** MW 3:00-4:30pm
